

DREE BÖKENS KING JULIO

Bay, *2007,
Hann., 16.2 ½ hands

by King Kolibri - Vulkano FRH - Julio Mariner xx -
Calypso II - Wienerwald - Agram - Agram

Co-owner:
World Show Jumping Champion
Jos Lansink, Belgium

We place great hopes on the 2009' licensed *King Julio* by *King Kolibri* (Jos Lansink) out of a *Vulkano* dam (originating from the famous line of the *State Premium Mare Alsterröschen* like *Stakkato Gold*, *Vesuv* and *Veronica*).

King Julio passed an excellent 30-day-test. At the age of four, he won several times in novice level tests for young show jumpers. In 2012 he will compete at some horse shows in Germany and, probably in the middle of 2013, he will move to the stable of his co-owner Jos Lansink in Belgium.

A spectacular performance pedigree for breeders of show jumpers!

The granddam *Athletica* is half-sister of *Vulkano* and won already as a seven-year-old horse the Grand Prix of Arezzo/Italy.

- 2nd in the Grand Prix of Monte Carlo/MON
- 4th in the Grand Prix of Arezzo/ITA
- Placed in the final of the Global Champions Tour (Sao Paulo/BRA)
- Winner of the Grand Prix in Wiesbaden/GER

Parents and Relatives ...

For a long time his sire **Voltaire** was successful in the international show jumping scene under Jos Lansink competing for the Netherlands.

The dam, **State Premium Mare Pretoria**, achieved top scores for jumping in her mare performance test and placed several times with the best up to advanced (S***) level. Her sire **Pit I** is one of the most molded sons of the Westphalian sire legend **Pilot**.

State Premium Mare Pretoria presented also the mare **Loro Piana Athletica** who was internationally winning under Giulia Martinengo Marquet (Italy). When bred to **Kolibri** (Gotthard of the East) she presented at the 2004' stallion licensing in Verden the attention-getting, strong-typed blue roan **King Kolibri**, who was already internationally successful under Jos Lansink at the age of eight. Although, he was chosen for the 2012' Olympic Games he was sold for a very high price to the USA in autumn of 2011.

When bred to **Voltaire**, the granddam **Granada** produced the licensed **Viva Voltaire**, who crossed over to Canada on the occasion of the stallion licensing in 1998. There, he won the final of the Canadian series for up-and-coming top-class show jumpers and became Reserve Champion in 2001. Now, his offspring cause a sensation. Two of his descendants qualified for the Pan American games in 2011. **Viva Voltaire's** full-sister **Vis-a-Vis** presented the licensed stallion **Hyperion** (by **Heraldik xx**), who was placed finalist at the Bundeschampionat for young eventers under Frank Ostholt. **Grannus** and **Argentinus**, two sires of the Oldenburg stud **Klatte** which were likely combined, follow in the third and fourth generation.

The black stallion **Grannus** hit the big time as sire for the international show jumping. Many countries have, respectively had, offspring of this great sire in their national teams.

Also **Argentinus** was successful up to the advanced (S) class and could early make a mark as an all-round sire at the highest level. At mare shows, stallion licensings, in dressage and show jumping and at all Bundeschampionats - his offspring is everywhere!

... Breeding Record

Vulkano convinces with his towering character, exemplary rideability and constant willingness to perform. He resoundingly inherits his attractive type. Despite of his low number of bred mares - due to his sport activity - he presented numerous winners at foal shows and successful participants at the German Foal Championship, as well as State Premium Mares and Champion Mares at shows. Meanwhile, his licensed son **Vesuv** and other offspring achieved many wins and high placings in tests for young show jumpers up to intermediate (M) class. His offspring were also sold for very high prices to the Emirates and the USA.

Voltaire	Furioso II	Furioso xx	v. Precipitation xx
